PROFESSIONAL SUMMARY

Final-year Software Engineering (BSc Hons) undergraduate with extensive experience in enterprise Java ecosystems, full-stack web architectures, and mobile application development. Proficient in Java, Spring Boot, React Native, RESTful APIs, and relational databases, with proven expertise in performance optimization and real-time data synchronization. Seeking a Software Engineering Internship / Entry-Level Role to build scalable, high-impact applications for global systems.

TECHNICAL SKILLS

Languages: Java (Advanced), TypeScript, JavaScript, SQL, PHP, HTML5, CSS3

Frameworks & Backend: Spring Boot, Jakarta EE / Java EE, Java Servlets, Express.js / Node.js, Hibernate ORM, MVC Architecture

Mobile Development: React Native, Android Studio (Material Design 3)

Databases & Middleware: MySQL (Query Optimization, Indexing), Firebase (Auth, Firestore, Realtime DB), WebSockets

DevOps, Testing & Tools: Apache JMeter (Load Testing), Git, GitHub, REST APIs, Postman, Payara / GlassFish, Agile/Scrum

ACADEMIC & INDEPENDENT PROJECTS

ZeroHunger – Sustainable Food Redistribution Platform *Java / Spring Boot, React Native, MySQL / Firebase*

- Engineered a full-stack web and mobile ecosystem designed to connect food donors with community organizations to reduce food waste.
- Designed and integrated high-performance RESTful APIs for seamless user registration, request tracking, and real-time status updates.
- Implemented efficient database queries and spatial/location indexing to optimize donor-to-recipient matching algorithms.
- Enforced secure user authentication and role-based access control (RBAC) to ensure compliance with privacy and safety standards.

NexCart – Multi-Vendor E-Commerce Platform *Java, Android Studio (Material 3), Firebase Realtime DB*

- Architected a scalable mobile e-commerce platform supporting multi-vendor seller dashboards and complex transaction workflows.
- Integrated Firebase Realtime Database for sub-second data synchronization across concurrent user sessions during checkout operations.
- Applied Material Design 3 guidelines and dynamic animations, reducing user navigation friction and boosting task-completion efficiency by ~30%.

LinkUp – Real-Time Enterprise Chat Application *React Native, Jakarta EE, WebSockets, Hibernate, MySQL, JMeter*

- Developed a cross-platform messaging application using React Native and WebSockets for low-latency, real-time communication.

- Optimized enterprise data persistence layer using Hibernate ORM over MySQL, reducing query execution times under heavy traffic loads.
- Conducted distributed load testing using Apache JMeter to identify system bottlenecks and stabilize message delivery under peak stress.

Web-Based Enterprise Management Platform *PHP, MySQL, JavaScript, HTML5, CSS3*

- Deployed a full-stack operational portal with role-based access control (RBAC) and CRUD matrices for tracking inventory across 5+ operational divisions.
- Optimized MySQL database schemas through targeted indexing, significantly accelerating concurrent read/write query execution times.

EDUCATION

Birmingham City University	United Kingdom (via Java Institute, SL)
<i>BSc (Hons) in Software Engineering – Expected: First Class Honours</i>	2024 – Present
Manadee Maha Vidyalaya	Aranayaka, Sri Lanka
<i>GCE Advanced Level (Commerce Stream)</i>	2021
<i>GCE Ordinary Level (8 Passes including ICT, Mathematics, and English)</i>	2018

LEADERSHIP & EXPERIENCE

Manadee Maha Vidyalaya	Aranayaka, Sri Lanka
<i>Head Prefect</i>	2020 – 2021
• Coordinated and led a student body of 500+ students, overseeing school operations, official event planning, and student welfare initiatives. • Developed strong cross-functional coordination, problem-solving, and verbal communication skills under fast-paced environments.
